## **DETAILED ACTION**

### ***Claim Objections***

The claims are objected to as not complying with 37 CFR 1.173(b). The amendment contains improper markings.

### ***Claim Rejections - 35 USC § 112***

Claims 1-4 are again rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of the plural "tumors" in claims 1 and 4 is still confusing, since applicant argues that the animal or human may have more than one type of tumor. This means that the recipient may also have only one tumor. Amending the claim to recite "one or more" will overcome this rejection, if this is the intent of the applicant.

In claims 1 and 4 the recitations "(such as lymphomas)" and "(such as leiomyomas)" are confusing as to what other malignant tumors and benign tumors are intended to be claims.

In view of the amendment to claims 1 and 4 the earlier rejection under 35 USC 112, paragraph one is withdrawn.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1614

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 are again rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 5,962,478 for the reason given in the Paper of September 21, 2001.

Applicant argues that there is nothing in '478 that says that pyridine substances can be used to treat neoplastic disease and that the only thing cited for the pyridones under the patent is the inhibiting action of the compounds on the effects of the TNF-alpha cytokine. This is not persuasive. '478 discloses (col. 19, lines 63-67 through col. 20, line 4) that the action of blocking the release, synthesis, and pathophysiologic actions of excessive levels of TNF-alpha relates to the use of TNF-alpha inhibitors in treating neoplastic disease.

#### **Action Is Final**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1614

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
